

QUICK GUIDELINE TO UPDATING A MATISSE POSITION INDICATOR

- Located on the back of the matisse are four buttons seen below

- Plug in your USB stick containing the matisse update file into the USB port on the back of the matisse
- Wait a few seconds for the on-board menu to come on after the USB has been plugged in. You can also access the menu by pressing the enter button.
- Use the up/down selector buttons to scroll to the USB stick option and then press enter
- Use the up/down selector buttons again to select the file you want to load into the matisse, and then press enter
- Press enter to confirm the update when asked by the matisse
- Matisse will begin the update process and once it's complete, the matisse will automatically reboot
- On completion of the reboot, you may remove the USB stick
